Grasscatcher for Razorcut 33 Sku - BGC33	Fitting the Brill Razorcut 33 push reel mower. Attach or detach the catcher from your mower.
Tumbleweed Tumbler Green Sku – 200003	<p>The Tumbleweed Compost Maker is an above-ground tumbling bin which rotates on a solid stainless-steel axis. Use kitchen, lawn and garden scraps to produce earthy compost in as little as 21 days!</p> <ul style="list-style-type: none"> • Compost produced in as little as 3 weeks in summer. • Unique tumbling action tips the contents from top to bottom to give maximum aeration. • Grass clippings composted easily either on their own or mixed with other ingredients. • At least four loads of compost can be produced in the time it takes traditional methods to produce one. <p>Gardeners have long been aware of the benefits of adding rich organic nutrients to the soil by composting. Now, thanks to the Tumbleweed Compost Maker, backyard and urban gardeners of all ages and abilities can compost quickly and cleanly.</p> <p>The patented design of the Tumbleweed Compost Maker takes the work out of composting by featuring a vertical tumbling action with dual-end, twist lock, animal-resistant vented lids which allow for easy filling and emptying of the bin, while producing maximum aeration.</p> <p>The solid stainless steel axis of the Tumbleweed Compost Maker creates an aerobic action that enables a quick and odorless form of composting. Put your kitchen and yard waste to work for you with a daily spin producing up to 8 cubic feet of earthy dark brown compost in as little as 21 days, without the need for any chemical starter!</p> <p>Constructed of UV-protected polypropylene plastic in a handsome hunter green, the assembled Tumbleweed Compost Maker stands 46" high, 26" wide, 34" inches deep, and weighs just 22 lbs. (assembled in about 15 minutes).</p> <p>Member Recommended by the National Home Gardening Club</p> <ul style="list-style-type: none"> • Assembled Height is 46" • Width is 26" • Depth 34" • Weight is 22lb • High impact UV treated polypropylene • Galvanized steel tube, as used in swimming pools • Stainless steel central breaker bar • Zinc plated steel fasteners • All components recyclable • Choose Black or Green

<p>Tumbleweed Tumbler Black Sku – 200003blk</p>	<p>The Tumbleweed Compost Maker is an above-ground tumbling bin which rotates on a solid stainless-steel axis. <p>Worm Farm Sku – 000013</p>	<p>Recycle your kitchen waste with a well-designed worm farm that works! Ideal for those with limited space and an environmental conscience.</p> <p>Our Worm Farm is comprised of one sturdy polypropylene box and a platform with a built in drain so you can collect compost tea. The upper box has a perforated floor and a lid, and the lower platform is fitted with a drain sprout. By having the worms in the top portion of the bin (kitchen scraps/organic waste is placed) the waste (liquid tea) filters through the perforated holes into the bottom bin that can be combined with water for use as an organic fertilizer rich in nutrients. As the worms actually eat the bacteria in the decomposed food there is no odor to worry about, simply add your scraps and see the results!</p> <p>First of all, line the base of the box with two or three layers of dampened newspaper. Add some partially rotted compost or potting mix, to form a layer about 1-2 inches deep. Add your purchased worms* and cover with a piece of dampened carpet, burlap or light resistant plastic (such as a garbage bag) cut to size. Place the scraps underneath this cover..</p> <p>The Worms Worms used in your Worm Farm need to be special Composting Worms (red worms). They are fast breeders and can consume their own weight in food in twenty-four hours. One thousand worms are all that is required to start off the farm (two thousand if you want to be up to capacity in a hurry), with each worm producing an egg capsule approximately every two weeks, each capsule containing between five and fifteen worms. These hatch in three weeks time and are mature within three months. The worms will breed to the environment so if you reduce the amount of food so too will the worm population decrease.</p> <p>*All of these topics and more are explained in detail in a foldout instruction sheet included with the composter.</p> <p>Worms: Suggested worm suppliers are included with the instructions or suppliers are readily available on the web, simply place the order and they are sent via the post!</p> <ul style="list-style-type: none"> • Constructed of UV treated High Impact Polypropylene Hardened Plastic • Upper box with perforated floor and lid • Lower box with drain sprout • Dimensions: Length 23 inches Width 15 inches Height 10 inches weight 10lbs
<p>Composting Accessory Kit Sku - CAG51590</p>	<p>Kit includes 1 of each: Green kitchen counter pail, thermometer, 4 oz. compost starter, book, 25 bio bags.</p>
<p>Garden Wise Compost Bin Sku - CAG001009</p>	<p>100% recycled Recycled type 5 plastic is in low demand (it's greener to use, and it's less likely to be affected by changes in commodity prices) Low shipping price - unassembled packaging reduces wasted box material and avoids some shipping fees Lid protects against rain and snow, while keeping squirrels, birds, insects, and other pests out. The bottomless design enriches the ground directly below the composter, while ensuring the proper moisture inside The trapezoid shape and air vents encourage vertical airflow with a chimney effect</p>
